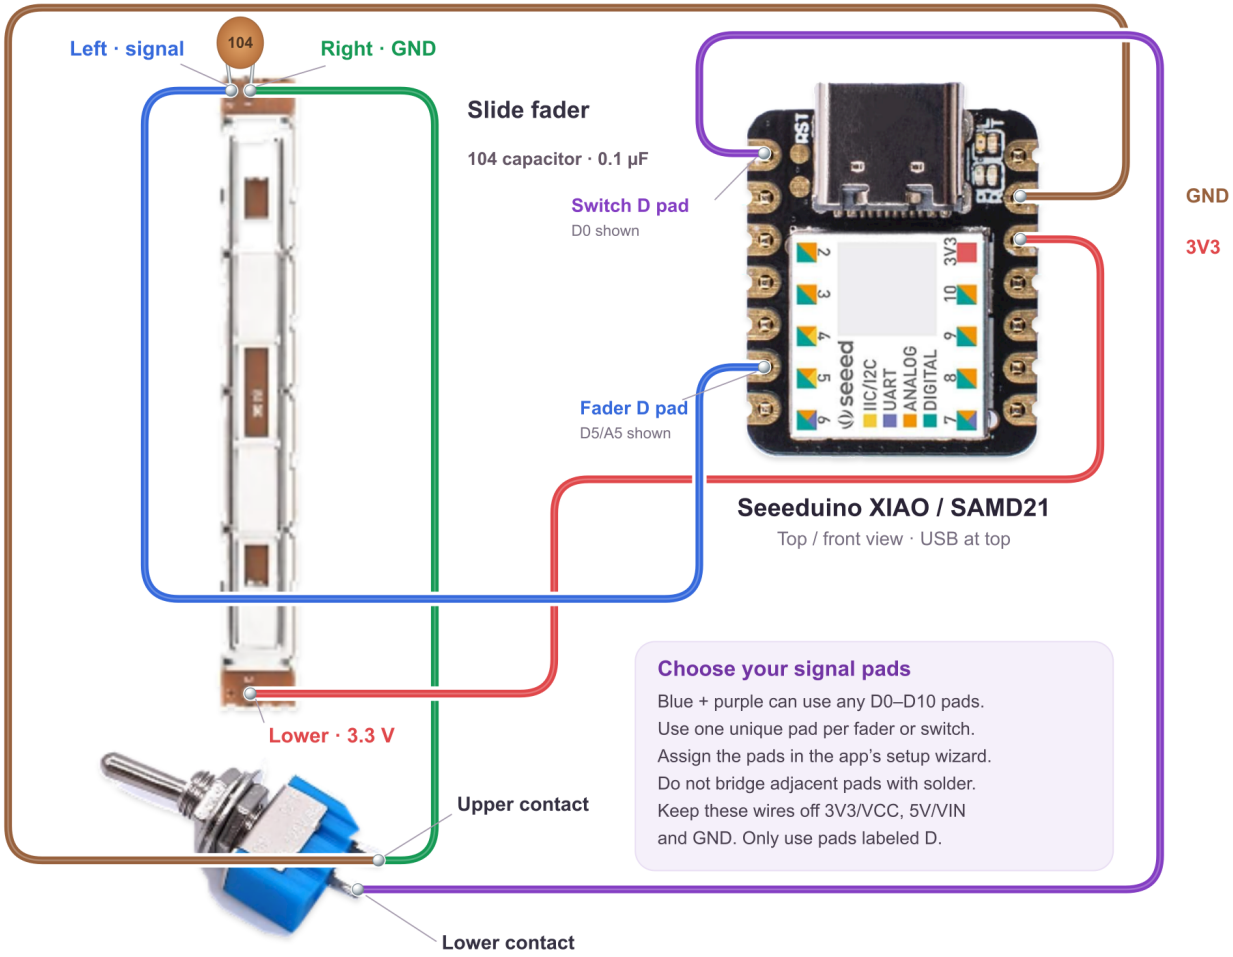
FADER PILOT BASIC

Fader solder side · board top view

One-channel wiring

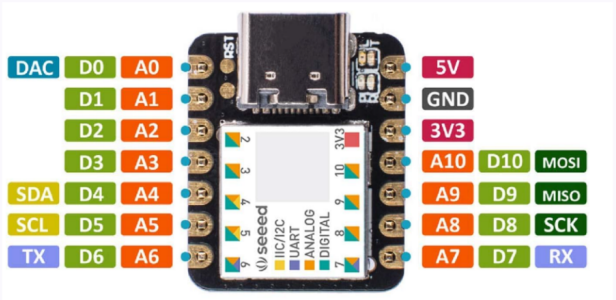
One fader + one mute switch. Repeat for each channel.



Five connections

- Right fader → upper switch
- Upper switch → board GND
- Left fader → its own D pad
- Lower switch → a separate D pad
- Lower fader → board 3V3

Your pinout reference · front view



Green + brown share the upper switch joint. Crossings are not connections.

D5/A5 and D0 shown as one example pair.
